Jignesh Zala
MEAN Stack Developer

As an Angular developer with 7+ years of experience, I have built scalable and responsive web applications using Angular, TypeScript, HTML, and CSS. I have also worked as a MEAN stack developer for over a year, gaining expertise in building full-stack web applications using Node.js, Express, MongoDB, and Angular.

PERSONAL PROJECTS

Blog Application
- The Blog Application is a personal project developed using Node.js and Angular. The application allows users to create, read, update, and delete blog posts, as well as comment on existing posts.

Rental Booking
- Developed a MEAN stack rental-booking app enabling easy property search and reservations. Used MongoDB, Express.js, Angular, and Node.js. Features include location-based search, owner property management.
- https://github.com/jigneshzala/angular-rental-booking

Natours - Tour Booking
- As a skilled developer, I built Natours - a tour booking platform using Node.js, which included essential features like Razorpay Payment Gateway and Geo-location services. My project demonstrated my expertise in building scalable and functional web applications.
